

AP-220

The AP-220 breathing air system is designed to produce clean breathing air from any high pressure air compressor. It uses Lawrence Factor's x65247 and x65677 cartridges to produce Grade E breathing air.

Specifications

- » Flow rate: compressors up to 50 CFM maximum
- » Approximate volume of processed air – 220,000 cubic feet
- » 6 anodized aluminum alloy purifier chambers with stainless steel rain caps
 - 4 desiccant filter cartridges – x65677
 - 2 catalyst filter cartridges – x65247
- » 2 anodized aluminum alloy moisture separators with bronze filter elements and a manual drain
- » Includes a pressure gauge, bleed valve, high flow priority valve, relief valve, and 2 check valves
- » Free standing package with lifting eyes and clearance for fork lift or pallet jack
- » Dimensions L x W x H [inches]: 41" x 14" x 41"
- » Weight [pounds]: ~400

* The amount of processed air for any purifier system always depends on the compressor condition and ambient air factors such as temperature and humidity.
