Stark V-35-E3 Compressor

- Air flow 35 CFM free air delivery @ 6000 PSI
- Motor – 30 HP, 220 or 440 volts, 3 phase
- Purification system - APA-140-5 (Four tall chambers)
- 4 stages, radial configuration
- Motor controls and over-load
- Inter-stage pressure gauges,
- Oil level sight glass
- Low oil & High air pressure shutdowns
- Automatic condensate drain system
- Vertical configuration, small foot print
- Dimensions 36" X 42" X 66" high,
- Weight = 1500 lbs.

Compressor block – V-35

The V-35 compressor package utilizes the same block as the V-45, but is slowed down to allow the use of a 30 HP motor. The secondary benefit is the increased compressor life that results from lower RPMs.

Front view of the compressor block

Stark Industries has consistently stayed away from programmable controllers on our compressors. The conventional controls on all of our equipment manufactured since 1969 have been extremely reliable and are still running today. This is in stark contrast to the enormous failure rate of PLCs as well as the inherent early obsolescence of computer controls. All other things being equal - - - -

Simplicity translates directly to reliability & long life.
